Please find below and/or attached an Office communication concerning this application or proceeding.

		Application N	No.	Applicant(s)	<i>W</i>				
Office Action Summary		10/849,027		OTAKI ET AL.					
		Examiner		Art Unit					
		Patricia Highte	ower	1711					
The MAILING DATE of this communication appears on the cover sheet with the correspondence address									
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).									
Status									
1)🖂	1)⊠ Responsive to communication(s) filed on 20 May 2004.								
·	This action is FINAL . 2b)⊠ This action is non-final.								
3)□	Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under <i>Ex parte Quayle</i> , 1935 C.D. 11, 453 O.G. 213.								
Disposition of Claims									
 4) Claim(s) 1-9 is/are pending in the application. 4a) Of the above claim(s) is/are withdrawn from consideration. 5) Claim(s) is/are allowed. 6) Claim(s) 1-9 is/are rejected. 7) Claim(s) is/are objected to. 8) Claim(s) are subject to restriction and/or election requirement. 									
Application Papers									
9) The specification is objected to by the Examiner. 10) The drawing(s) filed on is/are: a) accepted or b) objected to by the Examiner. Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a). Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d). 11) The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.									
Priority under 35 U.S.C. § 119									
12) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f). a) All b) Some * c) None of: 1. Certified copies of the priority documents have been received. 2. Certified copies of the priority documents have been received in Application No 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)). * See the attached detailed Office action for a list of the certified copies not received.									
2) Notice	t(s) e of References Cited (PTO-892) e of Draftsperson's Patent Drawing Review (PTO-94 mation Disclosure Statement(s) (PTO-1449 or PTO/5 r No(s)/Mail Date 9/29/04.	18)	Interview Summary Paper No(s)/Mail Da Notice of Informal Pa	(PTO-413) ite atent Application (PTC)-152)				

Application/Control Number: 10/849,027

Art Unit: 1711

Priority

The priority document(s) filed May 26, 2004 is acknowledged.

Information Disclosure Statement

The IDS filed September 29, 2004 has been considered and has been made record.

35 USC 102 Rejection

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- (e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

Claims 1-9 are rejected under 35 U.S.C. 102(e) as being anticipated by EPO 680 987 A2 (Harada et al).

EPO 680 987 A2 (Harada et al) discloses a method for producing a copolyamide which contains meta– and para- xylylene diamines as the diamine component and

Application/Control Number: 10/849,027

Art Unit: 1711

adipic acid as the main dicarboxylic acid component wherein the copolyamide produced from the homogeneous composition is crystalline and colorless and is excellent in heat resistance prepared by direct polycondensation anticipate the claimed invention. See abstract; page 2, col. 1, lines 3-11; page 2, lines 12 - page 6, lines 7; claims; example 2; especially page 2, lines 34-40, 48-58; page 3, col. 2 lines 1-37.

The references teaches at page 3, col. 1, lines 55 - col. 2, lines 1-40, in step (2) a diamine is dropped into the heated dicarboxylic acid; dropping of the diamine is preformed continuously or stepwise. To start the amidation at a substantial rate, the reaction temperature is preferably elevated to a temperature higher than 160°C and set to a temperature at which oligoamide and/or polyamide produced as an intermediate is in a molten state and the entire reaction system can be held in a uniform fluid state.

Obviousness –type Double Patenting Rejection

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-9 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-6 of U.S. Patent No. 5,587,447.

Application/Control Number: 10/849,027

Art Unit: 1711

Although the conflicting claims are not identical, they are not patentably distinct from each other because the instant application and the patent (USP 5,584,447) are viewed as claiming over lapping subject matter. The patent and the instant application are claimed a method of producing a (ca)polyamide prepared by dropping a diamine component comprising xylylene diamine onto a molten dicarboxylic acid component containing an adipic acid) continuously or stepwise at an elevated temperature of reaction higher than 160°C. Thus, in view of the claimed overlapping subject matter it is a clear instance in which one set of claims cannot be infringed without clearly infringing the other set of claims therefore, the obviousness-type double patenting rejection is proper.

Prior Art

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Harada et al '242 is cited to show the state of the art of copolyamide used to prepare a multilayered gas-barrier structure.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patricia Hampton Hightower whose telephone number is (571) 272-1073. The examiner can normally be reached on M-F from 9:30 A.M - 6:00 P. M.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, James Seidleck can be reached on (571) 272 1078. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
